EUROPEAN PRICE REPORT

Issue 11/2003
15 November 2003

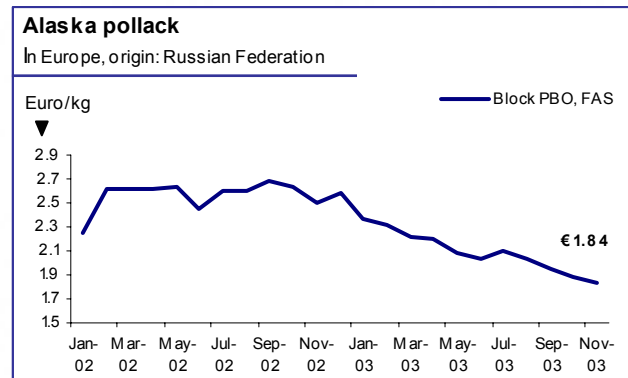

LATEST TRENDS

GROUND FISH

In the French market, buoyant demand in the catering sector is reported for cod back portions particularly in the 120-140 gr range. In the skinless fillet market, strong competition between Iceland, Norway and Russia has resulted in a significant drop in French import prices since June. Frozen Atlantic cod imports into France are up this year, +20% for the January-July period. In the French chilled cod sector, landings at Boulogne-sur-Mer are down over 40% for the first 9 months of the year while average prices are up almost 30%. Price quotes in the German market for frozen cod blocks (origin Lithuania) remain unchanged on those for recent months. Cod mince quotes, however, are down 15% on levels of 6 months ago. More

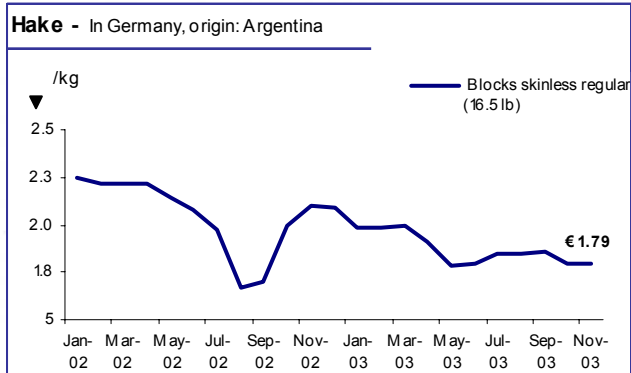

generally, German frozen Atlantic cod imports are up this year, 28% for the first seven months of the year, following an 8% drop in unit values compared with the January-July period in 2002.

Alaska pollock prices remain weak with US\$ quotes for pbo blocks this month down around 2% on October. The continued weakness of Alaska

pollock blocks of US and Russian origin has been attributed to increased competition from Chinese double frozen fillets. German imports of Chinese Alaska pollock fillets are up 68% to 35 600 MT for the first seven months of this year compared with the same period in 2002. Although unit values for imported Chinese fillets this year are up slightly (to US\$1.89/kg) on last year, they remain significantly below those for Russia (US\$2.39/kg) and the USA (US\$2.48/kg). In contrast to the broadly negative trend in fillet prices, an indication for mince blocks points to a 4-5% increase in US\$ terms on last month.

With the exception of a slight increase for certain *Merluccius gayi* fillet blocks, frozen hake quotes (in US\$) are unchanged on October.

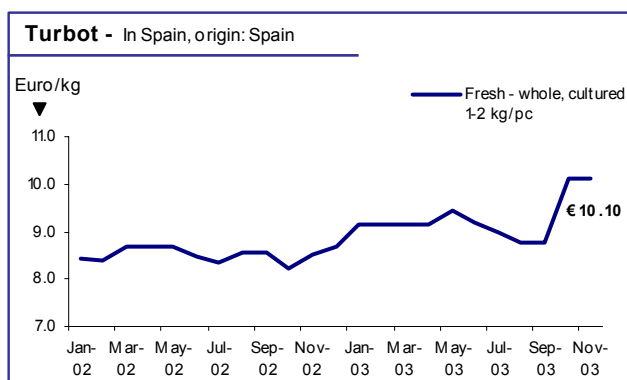

INDEX

Seabream	13

FLATFISH

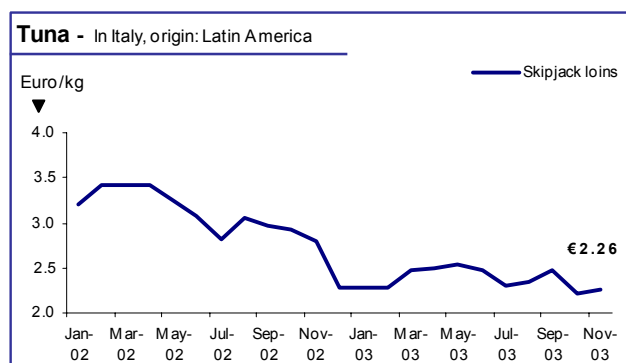

Poor demand was reported for farmed turbot in European markets during October. No significant improvement is expected this month. November price quotes, cif Spain, for most sizes are unchanged on those for October. A drop of 15% is, however, indicated for 2-3kg fish following a 10% increase in October. Due to an anticipated increase in supplies, prices for medium sizes may fall during the second half of November. Prices for the smaller sizes, already low, are unlikely to fall further.

In the Italian market, price quotes for chilled 1-2kg wild turbot from the Netherlands are down 9% on October. In recent weeks, markets for chilled fish generally in Italy have been quite weak with prices weak. Chilled sole prices from the Netherlands are down around 6% on last month's quotes. In contrast, in the Italian frozen flatfish market, Dutch sole prices are generally up (sizes 4 and 5) as are prices for plaice (size 3) compared to October quotes.

TUNA

Strong skipjack landings in the Indian ocean in October have put downward pressure on tuna prices in recent weeks. With European and African canneries well covered, prices in Thailand have been falling with skipjack reportedly as low as US\$750/MT. The negative trend has also affected yellowfin prices and this month's quotes regarding Indian Ocean origin, cif Italy, are down 5% for whole round. Yellowfin loins from Ecuador, c&f Europe, are down 8% while prices for skipjack loins are 5% less. Round skipjack quotes c&f Spain, are down 7%. With current demand conditions unlikely to change much over the next month, price levels are not expected to improve in the immediate future.

PELAGICS

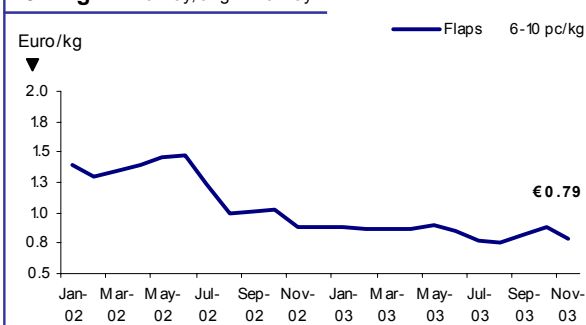

Strong Norwegian sales of both mackerel and herring to the Russian market are reported since the last report. Activity has slowed somewhat since the beginning of November with the Norwegian mackerel season winding down and with purse seiners switching more to horse mackerel.

In the mackerel market, reduced landings of larger size fish coincided with buoyant Norwegian sales of >600gr to both Japan and Russia. Larger mackerel are now in short supply in Norway. Although trade in the medium sizes has been slower, good sales to

Romania are reported. Compared to October, there has been a 4% decrease, in NOK terms, in the fob price for 400-600gr fish. In both euro and dollar terms, this price is significantly down on November 2002.

In the herring market, demand for skinless fillets in Europe is starting to increase as last season's stock diminishes. With fat content expected to drop over the next two months, demand for this season's stock should firm up and prices increase during the coming weeks. Competitive pricing for Icelandic flaps is reported in Polish, Russian and Ukrainian markets. Demand for frozen flaps in general is firm.

Herring - In Norway, origin: Norway

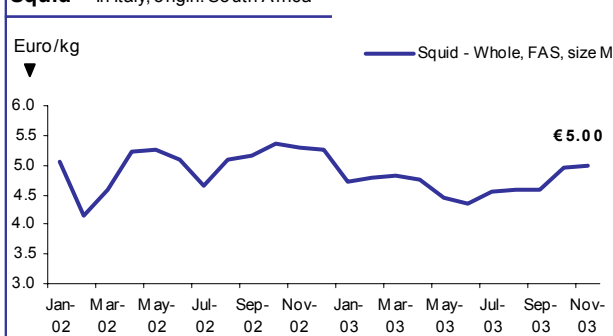

There are also good sales for frozen round spring spawning herring in the Russian and Ukrainian markets. Norwegian fob prices for >300gr and >350gr round herring are, however, down around 9% on last month.

Round frozen horse mackerel, mixed sizes, are quoted fob Norway at US\$560/MT.

CEPHALOPODS

There are indications of a firming of prices in European frozen squid markets. Feedback on the Spanish market refers to concerns about a possible shortage in the run up to Christmas based on disappointing landings in Morocco. The Moroccan squid season opened at the beginning of the month. C&f price quotes then for South African squid were up around 11% on October in dollar terms. In the Italian market, prices for *Loligo* cleaned tubes from India are up 2% on October quotes. Prices in Italy for chilled whole squid from France are, however, well down on indications for October.

Squid - In Italy, origin: South Africa

SALMON

After nine weeks of weekly price increases, fresh salmon prices from Norway started to slide back at the end of October. The resulting fall in salmon prices appears to have come to a halt by Mid-November. Higher demand from Continental smokehouses seems to be the main reason for the firming of prices combined with strong demand from Eastern Europe. The lower prices are caused by large quantities of salmon now available to buyers with industry reports indicating total Norwegian production

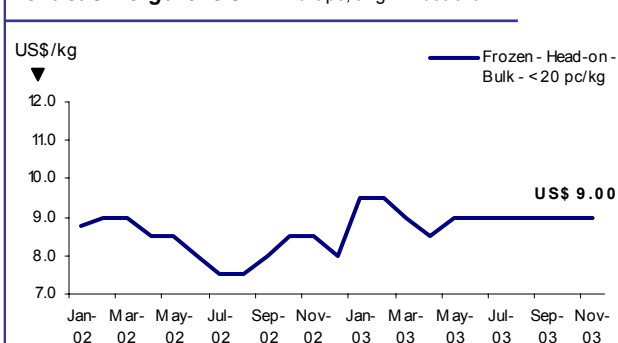

volumes for 2003 to reach 500,000 tonnes of salmon (round weight), up 13 % from 2002.

Total salmon exports from Norway for the first ten months of 2003 show a growth in volume of 15.9% but only 6% in value. Trout exports from Norway were down 11% in volume but a moderate 1.8% in value. Average export prices on salmon for the year were down from NOK 26.54 per kilo last year to NOK 24.29 this year.

SHRIMP

Compared to October quotes, there is no definite trend evident in the Italian market concerning frozen shrimp prices.

Penaeus merguensis - In Europe, origin: Australia

Cfr quotes for PUD *Penaeus indicus* are down slightly on last month. Indian PD *Penaeus* prices, in contrast, are up 2% while prices for smaller PUD grades are unchanged. The share of Indian shrimps in Italian frozen imports for the first seven months of 2003 is 8% in volume terms compared to 6% for the same period last year. Overall, Italian frozen shrimp imports are down 2% in volume terms but up 8% in value terms this year (seven months).

Ecuador is one of the fastest growing suppliers to European markets this year. For the month of September, volume exports to Europe are reported to be up 128% (105% in value) compared to September 2002. Increased sales levels are expected to continue until at least the end of the year which, combined with strong expected Brazilian sales, is likely to mean a continuation of current weak price levels.

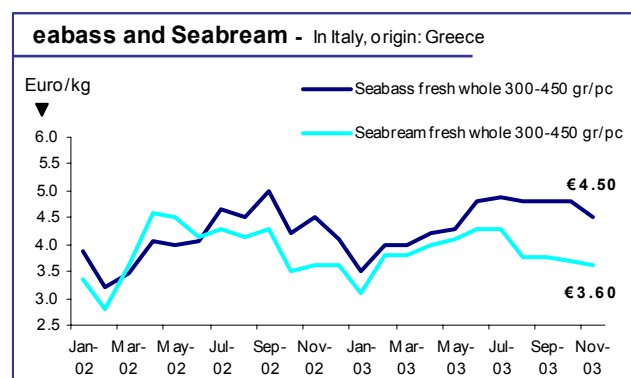

BIVALVES

With the winding down of the French bouchot (suspended) mussel season, demand for imported mussels in the French market is increasing. Price quotes for bottom cultivated Irish mussels are averaging around €750/MT which is, however, about 9% below the average indicated for October. Price differences between October and November are likely to reflect quality variations rather than fluctuations in demand.

Bulk prices in France for flat oysters are down due to competitive offers from the UK on the 60-70gr range.

SEABASS/SEABREAM

Both seabass and seabream prices have softened due to weak demand. Supplies from swing producers such as Turkey have also increased over the last three to four weeks and weekend prices further. An upswing in prices is expected in December due to seasonal demand surges. With many farmers planning to finish their stocks during the Christmas season, prices are expected to increase further in the new year. This is part of a yearly price cycle in which most farmers empty their pens in December and offer no new quantities until the next generation fish is available from mid-summer. The companies willing to keep fish for sale during the winter and spring months will benefit from higher prices but have also high costs in terms of weight losses and additional feeding.
